RE: Update - Flyers Drive/Wayne Street Sewer Construction Project

Dear Resident,

Since my last update, we've made some significant progress in moving the sewer installation project for your neighborhood forward. Here is the latest information:

Awarding of Construction Contract

The project's lowest bidder is Nutmeg Gravel & Excavation, Inc (NGE). In spite of inflation and other increases in construction costs, we were pleased that the NGE's bid came within 1% of our original cost projections back in 2006.

Construction to Begin

NPU will be signing the contract with NGE next week and construction will begin very soon after that. While there are many things which can affect a construction schedule, our goal is to complete our work before colder weather arrives. We know that any construction involving digging and the removal of paving is difficult at best. Please be patient and be assured that we work closely with our contractors. Our objective is to ensure that construction moves effectively, efficiently, and safely.

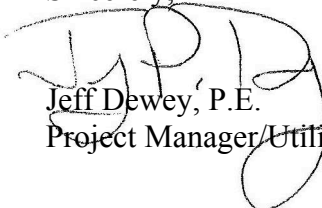

Interested in Natural Gas?

Remember that while the road is opened for sewer construction, NPU contractors will also be installing natural gas main in a separate trench. If you are interested in switching to natural gas, please let us know.

Questions or Concerns?

As a reminder, I will serve as your primary contact for any questions or concerns as the project proceeds. Please feel free to contact me at (860) 823-4516 or jeffdewey@npumail.com if you have questions or need assistance.

Sincerely,

Jeff Dewey, P.E.
Project Manager/Utility Engineer
