## **ENERGY STAR® qualified appliances save energy and money, and help protect the environment.**

Join the national effort to help use energy wisely. Buy appliances that have earned the Energy Star® rating. Only products delivering the highest level of energy efficiency are awarded the Energy Star® from the U.S. Environmental Protection Agency and the U.S. Department of Energy.

### **What's so important about Energy Star® qualified appliances?**

Saving energy also saves money. By using energy efficient products, the average household can save up to \$400 per year on utility bills. (Savings are estimated - actual savings may vary.)

According to the U.S. EPA, if just 10% of us used Energy Star® appliances, together we would reduce carbon dioxide pollution by the equivalent of planting 1.7 million acres of new trees.
