

# GAS SERVICE SURVEY

Norwich Public Utilities (NPU) is working with Precision Pipeline Solutions, LLC (PPS) to perform safety inspections of our natural gas meters in your neighborhood, as required by the State of Connecticut Public Utilities Regulatory Authority (PURA).

**This is a mandatory safety inspection that will take only a few minutes to perform.**

If your natural gas meter is outside of your residence, the inspection can be completed without your assistance. If you have an inside natural gas meter and are not home at the time of our visit, we will leave a doorhanger and/or card with information on how to schedule an appointment at a convenient time.

## WALKING SURVEY AREAS

In addition to business districts, which are surveyed every year, **this year's survey includes the Route 82 corridor, Cherry Hill, most of New London Turnpike and surrounding streets, Asylum Street and surrounding streets, Nordon Village, the Route 32 corridor between the Norwich Police Station and the Montville town line, including the West Side area.** The salmon-colored area on the map above shows this year's survey area.

All inspectors will have proper identification badges with the NPU and PPS logos. Upon your request, inspectors will wear a face mask and gloves while inside your home or business. **Contact NPU at 860-887-2555 or visit [norwichpublicutilities.com](http://norwichpublicutilities.com) for more information.**
